

USER MANUAL

1.Installation and Setup:

- Start by downloading and installing the application on your device.
- Once the installation is complete, launch the application.
- During the initial setup, you will be prompted to grant the necessary permissions required for the application to function optimally. Follow the on-screen instructions to provide the required permissions.

2. Login:

- To access the application, login using your unique identification credentials.
- If you don't have an account, you can create one by clicking on the sign-up button.
- Follow the registration process to provide the necessary details and create your account.

3. Sign-Up:

- If you don't already have an account, click on the sign-up button to initiate the account creation process.
- Fill in the required information, such as your name, email address, and password.
- Follow any additional steps as prompted, such as verifying your email or setting up a profile.

4.Using the Application:

- Once logged in, you can make use of the application's features.
- To find specific information or perform a search, type the desired keyword into the search bar.
- The application will display the relevant results based on your search query.
- Explore the various functionalities and options available within the application to enhance your experience.
- Make sure to familiarize yourself with the navigation and features for efficient usage.
